In the first nine months of its existence, Aqua Aid has awarded more than $3,000 in grants to low-income customers. Aqua Aid is an assistance program designed to enable customers in need to receive uninterrupted water service. Funded by donations from Aqua customers, neighbors can help neighbors directly in their own communities. In addition to financial assistance, customers are also encouraged to learn about how to identify leaks, protect pipes, and use water wisely through WaterSmart Tips.

Upon acquisition of the Peotone systems, Aqua was immediately designing improvements and implementing maintenance programs to ensure safe and reliable service to customers.

John Bobera
Operations Team Lead, Will County

The new interchange is located between two of Kankakee County’s major transportation thoroughfares and within a few miles of the State of Illinois’ two largest economic development projects.

With the extension of water and sewer utilities through the Village’s partnership with Aqua Illinois, the area is perfectly positioned for economic growth and development.

Paul Shore
Mayor of Bourbonnais
